

You are cordially invited to the
DELAWARE ASSOCIATION OF SURVEYORS, INC.
General Membership Meeting

Tuesday, April 18, 2017
Hilton Wilmington/Christiana
100 Continental Drive, Newark, DE

5:30 pm	Cash Bar
6:15 pm	Dinner -- Buffet featuring Gemelatto Rockfish and Sliced Roast Beef
7:15 pm	Program: Presentation on EDM Calibration Baselines
8:30 pm	Closing Remarks & Adjournment

How close are you to your technology? We all studied slope and temperature corrections for measuring tapes to pass our license exam. But how many of your field crews are still using measuring tapes in their work? Whenever you buy anything by weight, volume or length in the State of Delaware, the seller must use a calibrated scale, container or tape. Except real estate. Imagine that, the most expensive purchase a person will ever make and there is no requirement to utilize a calibrated measuring device. Ask any surveyor what it is that surveyors do and they will tell you that they are "expert measurers". Are you an expert measurer? Would you like to learn how to ensure your edm is functioning property? Join us April 18th to learn!

One (1) credit of continuing education will be awarded. Certificates will be awarded to those attending, whose signatures appear on the Class Attendance/Roster, which will be available at the end of the presentation. Certificates will be mailed separately.
